Schedule

A week-by-week breakdown of the material.

Week 1 (09/05-09/09)

- Day 1

    - Numbers: Rationals, Reals, Complex[1]
    - Basic proof techniques: Direct[2]
    - Assignment 1[3]

- Day 2

    - Basic proof techniques: Indirect[4]
    - Square root of 2 is irrational[5]
    - Quantifiers[6]

- Day 3

    - Principle of Mathematical Induction[7]
    - Strong induction and Well-Ordering Principle[8]
    - Fibonnaci Numbers[9]
    - Assignment 2[10]

Week 2 (09/12-09/16)

- Day 1

    - Divisibility[11]
    - Prime and Composite Numbers[12]
    - Assignment 3[13]

- Day 2

    - Patterns in the Primes[14]

---

[1] notes/numbers_intro.html
[2] notes/proofs_basic.html
[3] assignments/1.html
[4] notes/proofs_basic.html
[5] notes/irrationality_of_sqrt2.html
[6] notes/proofs_quantifiers.html
[7] notes/proofs_induction.html
[8] notes/proofs_induction_other.html
[9] notes/numbers_fibonacci.html
[10] assignments/2.html
[11] notes/numbers_divisibility.html
[12] notes/primes_intro.html
[13] assignments/3.html
[14] notes/primes_patterns.html

- **–** Common Divisors[15]
- Day 3
    - **–** The Division Theorem[16]

Week 3 (09/19-09/23)

- Day 1
    - **–** A weird number system[17]
    - **–** The Division Theorem (cont)[18]
    - **–** Assignment 4[19]
- Day 2
    - **–** The Euclidean Algorithm[20]
    - **–** Diophantine Equations[21]
- Day 3
    - **–** Euclidean Division and Diophantine Equations[22]
    - **–** Finding all Solutions[23]
    - **–** Assignment 5[24]

Week 4 (09/26-09/30)

- Day 1
    - **–** Fundamental Theorem of Arithmetic[25]
    - **–** Consequences of Fundamental Theorem[26]
- Day 2
    - **–** Modular Arithmetic and Congruences[27]
- Day 3
    - **–** Arithmetic with Congruences[28]

---

[26]notes/numbers_fta_consequences.html
[27]notes/congruence_intro.html
[28]notes/congruence_arithmetic.html

Week 5 (10/03-10/07)

- Day 1
  - Chinese Remainder Theorem[29]
  - Assignment 6[30]
- Day 2
  - Congruence Classes as a Number System[31]
- Day 3
  - Multiplicative Inverses[32]

Week 6 (10/10-10/14)

- Day 1
  - Basics of Encryption[33]
  - Encryption via Multiplication[34]
- Day 2
  - MIDTERM (Study guide[35])
- Day 3
  - Fermat's Little Theorem[36]
  - Assignment 7[37]

Week 7 (10/17-10/21)

- Day 1
  - Fall Break
- Day 2
  - Reduced Residues and phi[38]
- Day 3
  - Reduced Residues and phi (cont)[39]

---

[36]notes/congruence_fermats.html
[37]assignments/7.html
[38]notes/residues_basic.html
[39]notes/residues_basic.html

Week 8 (10/24-10/28)

- Day 1
  - Reduced Residues and phi (cont)[40]
  - Euler's Theorem[41]
  - Assignment 8[42]
- Day 2
  - Encryption via Exponentiation[43]
- Day 3
  - Public Key Cryprography and RSA[44]

Week 9 (10/31-11/04)

- Day 1
  - Public Key Cryprography and RSA (cont)[45]
- Day 2
  - Order of Elements in Zn[46]
- Day 3
  - Polynomials over Zn[47]

Week 10 (11/07-11/11)

- Day 1
  - Primitive Roots[48]
- Day 2
  - Primitive Roots (cont)[49]
- Day 3
  - MIDTERM (Study guide[50])

[40]notes/residues_basic.html
[41]notes/residues_eulers_theorem.html
[42]assignments/8.html

[46]notes/residues_order.html
[47]notes/residues_polynomials.html
[48]notes/residues_primitive_roots.html
[49]notes/residues_primitive_roots.html
[50]notes/studyGuide2.html

Week 11 (11/14-11/18)

- Day 1
    - Applications of Primitive Roots: Diffie-Hellman protocol[51]
- Day 2
    - Applications of Primitive Roots: Diffie-Hellman protocol (cont)[52]
    - Quadratic Residues[53]
    - Assignment 9[54]
- Day 3
    - Quadratic Residues (cont)[55]

Week 12 (11/21-11/25)

- Day 1
    - Law of Quadratic Reciprocity[56]
- Day 2
    - Thanksgiving
- Day 3
    - Thanksgiving

Week 13 (11/28-12/02)

- Day 1
    - Gauss's Lemma[57]
- Day 2
    - Proof of Quadratic Reciprocity[58]
    - Assignment 10[59]
- Day 3
    - Primality Tests[60]

Week 14 (12/05-12/09)

- Day 1
  - Primality Tests (cont)[61]
- Day 2
  - TBA
- Day 3
  - TBA
